Why buy Bott ?

All Bott manufactured workshop storage products can benefit from an extended 10 year guarantee.

Built to Last - Our Customer Promise

At Bott, we've always believed in delivering products which are up to the job and represent a strong long term investment. Our Built to Last philosophy drives every aspect of our business processes. From design, to testing, to manufacture, our processes and culture give us the confidence to stand behind our products. Read on to find out how we optimise our operations to ensure we deliver workplace storage solutions Built to Last.

A Dedicated Internal Design Team

Our in-house designers focus on understanding customer requirements and developing products which deliver useful functionality and stand the test of time in demanding environments. This process ensures we select the right raw materials, design robust products and follow structured production plans to eliminate possible failure modes.

A Rigorous Testing program.

From arduous load tests to saltwater spray corrosion testing, we push products to the limit so you can be confident in their performance.

A State of The art Factory with a Quality Focused Workforce

We've invested in a state of the art factory in Cornwall, utilising the latest CNC technology and lean production techniques guaranteeing efficiency and repeatable high quality. In addition, our long serving team work together to continually improve both products and processes, ensuring a culture of customer focused quality.

For full details and all terms and conditions please visit www.bottltd.co.uk/guarantee

Bott multi media

To help you get a better understanding of the company and products a selection of videos have been created. To view the complete series visit bottltd.co.uk

The Bott workplace consultancy service

Our project sales team can work with you on large installations to understand your requirements.

Using their knowledge and experience they will propose a tailored solution and provide full 3D simulations giving a clear visual impression of the proposed workspace.

We have a complete project management service; from manufacture to final installation, ensuring the highest quality at all stages and making the process simple and trouble-free for you.

- **Understand**
- **Develop**
- **Manufacture**
- **Deliver**
- **Install**
- **Aftersales**

Understand your requirements

At the start of your project, one of the project sales engineering team will visit your site to gain an in depth understanding of your business and the exact project requirements.

Develop your solution

We work closely with our clients, using our skills and expertise to develop a solution which is based around their needs. Clients receive 3D visual simulations of proposed options to give a clear impression of the final solution.

Manufacture your equipment

Your equipment is manufactured to order in our UK plant.

We use the latest equipment and methodologies to ensure quality and we are fully ISO 9001 and ISO 14001 certified.

Deliver your solution

We work closely with your site team to ensure delivery is at a mutually accepted timescale.

Where possible the Bott fleet of vehicles will be used ensuring the same level of care and dedication is applied as in all other stages of the project and ensures the products arrive with you in excellent condition.

Install your workspace

If required the Bott installation team will unwrap, assemble and position the equipment.

Bott installation ensures the optimum fitment of the chosen items and offers the minimum disruption to your production process and a swift and easy transfer to your new workspace.

Aftersales support

At Bott, we pride ourselves on our long-term business relationships, so you can be assured of an excellent aftersales service, ensuring you get the very best from your custom solution.

Adjustable Dividers

Galvanised metal dividers allow custom layouts to be easily created and amended as requirements change.

Box kits

Removable boxes in a wide range of sizes and heights.

Plastic Troughs

Tough plastic trough sections in two, three or four channel types. All are sub dividable and removable.

Inlay Mats

Rubber matting provides a softer, safer base for expensive or delicate items and can reduce noise levels.

Back & End Panels

Panels sets are available for both the endframes and rear of bench in perfo, louvre or combined styles.

Suitable for use on any bench.

Back panels shown in the optional colour RAL7016 grey, standard colour is RAL5010 blue.

**Overhead Frame**

Rear overhead frame system, fitted to the bench frame to increase strength and rigidity.

The full height frame incorporates a 240v fluorescent light tube and should be used in conjunction with the minimum of either the shelf or a back-panel. Overall height is 1240mm above the worktop.

Separate models of frame and uprights are available to suit the framework bench range or storage bench models.

The panels, shelf and service duct will fit both styles.

Suitable for 1500mm or 2000mm wide models in any depth.

Shelf Cupboards

- Heavy duty housing with up to 1 tonne total load capacity
- Lockable, reinforced doors with perfo liner panels
- Galvanised steel shelves adjustable on 25mm pitch
- 100kg U.D.L. shelf capacity
- Optional liner panels and 75kg capacity drawers
- 1050mm x 650mm models shown, many other plan sizes with choice of heights available in the full range, please ask for details

Full catalogue

In addition to these product highlights a full 260 page 2014 catalogue is available covering our full range.

Fully priced, the catalogue may be downloaded from www.bottltd.co.uk or ask for a printed copy

verso

With proven durability, Bott verso is strong and modular, enabling a value for money solution which can expand as your business grows.

Covering all common requirements with a combination of drawer cabinets, cupboards, and workbenches.

perfo

A simple, adaptable storage system. The Bott perfo system is space efficient, aiding workshop management with designated tool storage locations.

The range is also integrated within the Bott cubio and verso ranges, and can form part of your fitted solution.

CNC Storage

The Bott CNC storage system protects expensive tooling, ensuring security for your business assets.

The system provides both static and mobile options. CNC storage products can also be integrated with the Bott cubio range.

Facilities Management

A collection of products designed to help to manage the cleaning, recycling, quality and data tasks that are essential in today's workplace.

Recycling units, cleaning stations and information boards are joined by the PPE, computer and hazardous substance storage cupboards and lecterns.

Cases & Seating

To complement your solution, Bott offer a full range of seating and storage cases, all meeting our exacting quality standards.
